

## STFXAUT RESPONSE TO STFX ADMINISTRATORS' NEGOTIATION UPDATE

The following responds to the STFX administration's recent "Negotiation Update" issued on January 21, 2013. This commentary addresses the individual statements raised in the communication distributed by administration.

A FAIR AND REASONABLE OFFER	
The University has made a fair and reasonable	The administration's offer is lower than recent
offer, comparable to recent Atlantic and	settlements in Nova Scotia and is lower than
Canadian faculty settlements at other	both the historic and forecasted CPI levels. We
universities.	are the one of the lowest paid groups in the
	region however our administration is one of
	the highest paid. STFX has the highest paid
	University President and the highest paid Vice
	President in Nova Scotia (excluding Dalhousie).
The University's offer is made despite a series	The funding cutbacks of 10% occurred in the
of funding cutbacks totaling 10% by the	past and over a three to four year prior
provincial government to post-secondary	period; those known funding cuts were offset
education, including a fourth cut of 3% this	by tuition increases of 3% per year. In this
year.	year, the administration remained able to
	project a balanced budget. There are also
	known increases in government funding in
	future years. The pressure on projected
	revenue is a failure to plan for a modest
	decline in enrollment that MPHEC has been
	predicting for several years.
The University's offer is made at a time when	The administrators' claim to be facing a
the University is facing a substantial deficit	substantial deficit is made without any
and limited projected revenue.	rationale or sense of accountability. Residence
	vacancies are in large part due to flawed
	administrative policies. Tax penalties are due
	to flawed accounting. Heating fuel costs
	increases are due to improper cost
	forecasting. The deficit ballooned between
	October and January for unknown reasons,
	even though enrollment, vacancy rates and
	government funding levels were known. None
	of the noted excuses for a \$4Million deficit are
	systemic issues that should be expected to be
	repeated in future years. The building of two
	new residences in the face of enrollment
	decline and funding pressures in an
	environment in which there are currently 200

Finance made \$212,507 (ANSUT), or a combined total of \$520,000 per year, which over four years is \$2.1 million for a gap of close to just 2 (not 55) positions.The AUT Executive four -year demand of approximately \$8.2 million includes approximately \$5.2 million in salary increases and \$3.0 million in non-salary items.Representing the request as a cumulative total over four years neglects to consider that budget and financials are prepared on a yearly basis and the four year cumulative number is an attempt to exaggerate the issue. Further, their estimates are overstated and no information as to the cost composition have been forthcoming. The first year salary request from STFXAUT is 1.5%, which is the same as the STFX offer, and the second year request and offer are similar. For context, a 1% increase in salary for all full time STFXAUT members is roughly \$265,000.The University encourages the AUT Executive to share the complete details of the latest opinions and vote.The STFXAUT has hosted numerous meetings with its members and have placed numerous postings to STFXAUT.ca to inform members. STFXAUT members are certainly not being informed by the administration's attempt to provide misleading and fabricated information	The AUT four-year demand is approximately \$8.2Million. The University's offer is approximately \$5.5 million, leaving a total monetary gap of approximately \$2.7 million, the equivalent of 55 full time positions across the University.	vacant rooms suggests a flawed model of administration instead of a proactive one. If the new residences are built to offset the closure of rooms in MSB, then the business case for these residences must be brought into question. The gap is over-estimated to start and is the total of four years; it should be presented on an annualized basis as budgets and financial statements are prepared on an annualized basis. Further, the savings from the retirement program is sufficient to fund the noted monetary gap resulting from our outstanding proposals and further allow for savings for the University. The number of full-time positions represented by the gap can also be expressed in alternative ways. For example, in 2010-2011 (2011-12 figures are not public) the StFX President made \$305,360 (ANSUT) and VP
The AUT Executive four -year demand of approximately \$8.2 million includes approximately \$5.2 million in salary increases and \$3.0 million in non-salary items.Representing the request as a cumulative total over four years neglects to consider that budget and financials are prepared on a yearly basis and the four year cumulative number is an attempt to exaggerate the issue. I le g "three times recent settlements")		(e.g., "three times recent settlements").
Members have already given the Executive a		

mandate to undertake strike action if
necessary. The next vote will be to ratify an
agreement, which will only materialize if
administrators choose to negotiate.

SECTION 1: Financial Impact of AUT	Executive's Non-Salary Request
The total cost of the non-salary demands is	There was no rationale provided to
\$2,982,00	substantiate the numbers provided by the
	administrators. These are not "demands" but
	requests to be negotiated between STFXAUT
	and the administrators. On an annualized
	basis, not a four year cumulative total, the
	amount they are projecting is \$745,500 not
	\$2.98 million. The \$745,500 is also not
	substantiated and, based on STFXAUT analysis,
	it is a fabrication. For example:
	Course relief for Chair/Coordinators: the
	administration simply agreed to reinstate
	course relief for a handful of chairs/
	coordinators of small departments who
	were excluded in the previous contract.
	The administration calculates the impact
	to be 387,000. In fact, the maximum
	impact would be a handful of 3-credit
	stipends assuming full replacement.
	• Travel fund: assuming that there is no
	change in the rate of conference
	presentations by faculty, then there should
	be a negligible financial impact of
	protecting these funds in the collective
	agreement.
	<ul> <li>Coordination of benefits: our proposal is to oncure that the charges are no longer</li> </ul>
	ensure that the spouses are no longer denied enrollment in the group benefits
	plan provided by our collective agreement.
	This proposal affects less than a dozen
	members.
	The preceding examples indicate either an
	inability to reasonably forecast expenses, or a
	purposeful attempt to mislead the public.
	parposerar accompt to misicau the public.

SECTION 2: Summary of Significant Elements of University Non-Salary Offer per Group	
OVERALL: Extension of Health and Dental benefits to those over 65 years of age	Finally! The administration was directed by Nova Scotia Human Rights Commission to no longer deny benefits to members based on age.
OVERALL: Coordination of benefits for spousal members of AUT.	This issue is a grievable issue and one that the administration would have had to make anyway, as all members should receive the full benefits, including married members without one being a "dependent" of the other.
FACULTY: Course release of at least three credits for Chairs/Coordinators with >1 member.	Our proposal was to correct the change imposed in the last Collective Agreement. The change is in the administration's interest as there was difficulty in getting volunteers to serve as Chairs and Coordinators.
FACULTY: Travel funds included in Collective Agreement	The funds existed before but, under our proposal, would be protected by the Collective Agreement and of equal value across Faculties. Administration retains the approval process.
FACULTY: Retirement Options	The administration pulled their retirement options from the table. Nevertheless, the STFXAUT put both a retirement allowance and a phased-in retirement proposal on the table. Our proposal for the retirement allowance fixes the problem of a narrow window of eligibility. Their response accepts the eligibility parameters yet reduces the payout to make it far less of an incentive to retire. Their response amounts to a reduction to the allowance provided in the current collective agreement, and further, would remove it as a standing article in the collective agreement. Our analysis of our proposals suggests a potential for savings of well over \$3M over 5 years if only 10 people retire, with additional savings produced by the phased-in option.
FACULTY: Improved clarity regarding existing Program Redundancy and Financial Exigency language	The changes suggested by the administrators are not about "clarity" as they suggest but make the test for financial exigency and program redundancy much easier to invoke and weaken our ability to protect job security.

PART-TIME: Improved long-service	Long-service supplements need some
supplement.	improvement and the changes proposed are
	only modest.
LIBRARIANS: Librarian salary grid to parallel	Status quo. Librarian salaries were already
Faculty grid.	linked to the faculty grid in all prior Collective
	Agreements; how is this an improvement or a
	significant element?
LIBRARIANS: Retirement incentives same as	To reiterate, administration withdrew their
Faculty	retirement options. STFXAUT proposed both
	the retirement allowance and phased-in
	retirement options. (see above)
CLINICAL ASSOCIATES: Group name updated	Does housekeeping within the agreement rise
to Nurse Educators to reflect industry practice.	to the level of a significant element of a
	contract?
EXTENSION AND COADY: Changes to	The changes provide no benefit to our
promotion evaluation language and work plan	members but were tabled by the
development.	administration in the interest of strengthening
	managerial prerogative.
WRITING CENTRE INSTRUCTORS:	The administration proposed no change to the
Implementation of salary grid.	current salaries of Writing Centre Instructors
	but would force members to accept their
	current salaries.

SECTION 3: Comparative Compensation Grid	
Floor of Assistant and Top of Scale Professor	Floors and tops do not address the number of steps, promotion requirements and the size of each step increment, all of which factor into life time earnings. The administration's focus on professors also ignores all other
	employment categories in the STFXAUT.

SECTION 4: Comparative Health and Dental Benefits	
Employer and Employee costs	Hold on! The administration admitted that they have been providing inaccurate information to the StFXAUT with respect to the value of our benefits. For example, the value of single member coverage is only \$1,010 per year, not \$1700. Our proposal for a new Health Care Spending Account would
	result in benefits coverage that is less than their public statements about current value of

single member benefits, which have been
overstated by 68%. Furthermore, the
comparison with other institutions is
somewhat meaningless (i.e., comparing apples
and oranges). Paying 100% of the plan which
requires a Member to pay 20% to 50% at the
dentist's office for certain procedures is not
100% coverage! Also, the administration
neglected to provide a comparison of pension
benefits (we are amongst the few universities
that have a defined contribution plan instead
of defined benefits), and our analysis indicates
we are significantly behind in benefit totals.

SECTION 5: Compensation Details	
Increases are between 16.18% and 21.87%.	Under the administration's proposal, members' salaries will increase 1.5%, 1.5%, 1.75%, and 2.0% - not 21.87%. At CBU, one of the examples provided (despite not being in our agreed to comparator group), the increase in salaries is 2.9% in this current academic year. With an offer of 1.5% we are falling further behind comparators. More problematically, as per the administration's recurring tactic, they have included progression through the ranks which members are already entitled to receive. Steps up the salary scale (progress through the ranks) are a guaranteed condition of employment in the university sector. Combining progression through the ranks with salary increases is an inappropriate framing of increases. Under the administration's proposal, the increase from our current scale averages only 1.6875% per year for four years. Finally, it must also be kept in mind that many of our members have prorated salaries based on less than full year contracts, so the salary grid is misleading.
